Conifers 2010

The world of conifers is vast. Though it includes such familiar favorites as the juniper and Redwood tree, there are also many unusual selections that we love to stock. Collectors, Train Garden Enthusiast and Bonsai Specialist will all hopefully find varieties suitable for their hobby. If you've never been a "juniper" fan, don't disregard this category. Our selections have characteristics that include blue, yellow, lime green, or deep green foliage color. Textures are often soft and billowy. Growth forms range from globes, mounds, pyramids, narrow columns, and flat groundcovers to tall stately trees. Visit our nursery to see the possibilities. However, our stock changes rapidly so call ahead if you need a specific variety.
